

EXPERIENCE

IntelX Labs Private Limited | intelxlabs.com

Remote, Surat, India

Senior Frontend Engineer - II

Sept 2024 - Present

- Building & maintaining a responsive robust dashboard web-application solution that scaled to 20K daily users; optimized API performance by selectively calling category or subcategory specific endpoints instead of fetching all data at once, reduced database load and API response time by 50%.
- Implemented conditional rendering for the side menu by integrating IAM-based role-based access control (RBAC) in the Go backend, ensuring user permissions are fetched and applied at the initial dashboard load.

Xamtac Consulting LLC | xamtac.com

Remote, Chicago, Illinois

Mid-level Frontend Developer

Jun 2023 - Jul 2024

- Engineered a comprehensive SaaS solution for marketing agencies, featuring streamlined client onboarding, campaign planning, and communication generation; enhanced lead conversion rates by 25% and reduced operational workload by 35% with certain automation.
- Collaborated with peer engineers and UI/UX designers to debug and resolve technical issues, successfully merging 50+ pull requests monthly, thereby reducing system downtime by 20% and improving user satisfaction by 15%

Pillar Project Worldwide Limited | pillar.fi

Remote, London & Wales, ENG

Junior Frontend Developer

Jun 2022 - Nov 2022

- Shipped features like notification toast, network switches, authentication, interactive tokens data visualization system using doughnut charts within connected wallets, optimized UI through loading state enhancements, Sentry integration & more, that improved user engagement by 40%.
- **Pillar Staking Website:** Initiated an in-house staking website to stake \$PLR tokens via ABI (Application Binary Interface) interaction with rewards distributed in wETH.

PROGRAMMING SKILLS

- **Languages:** Go, JavaScript & TypeScript **Frameworks:** React, Node, Next, Tailwind, Mantine & Bootstrap
- **Cloud:** MongoDB Atlas, GCP, Azure & Amazon S3 **Tools:** Vercel, Railway, tRPC, PostgreSQL, MySQL & Figma

PROJECTS

fmgr | Next.js + tRPC + Drizzle ORM + Supabase + UploadThing

Aug 2024

- Streamlined DMS with responsive layouts, modern navigation, & key features - enhanced UX by 20%.
- Developed and integrated a nested folder structure with advanced search and timeline tracking, significantly improving file organization and retrieval efficiency.

Customer Relationship Management Dashboard | Next.js + tRPC + Prisma ORM + Neon DB

Mar 2024

- Implemented a CRM system with file upload capability, boosting interaction efficiency by 25%.
- **What I learnt:** Full stack development with TypeScript, IaaS & AWS Cloud Storage

EDUCATION

Shri Shankaracharya Technical Campus

Bhilai, IN

Bachelor of Technology in Information Technology

Aug 2019 - Jul 2023

EXTRACURRICULAR ACTIVITY

DEVSTRONS' | devstrons.org

Community

Community Founder

Jul 2021 - May 2023

- Mentored 500+ folks holding responsibilities such as GitHub Campus Expert & Postman Student Leader
- Introduced the first student-run debugging contest with a conference, BUGTRONS
